BORÉALE

A refined design

Acoustic and Design

Created in-house by our teams with a strong desire of new esthetic, the Boreale partition is characterized by its clean and smart lines.

This partition allows space management with no visual disjunction for unique projects.

A CURVED GLASS WALL ALL OVER THE DOOR

The Boreale frame innovative system minimizes the entire structure. All the framed aluminum doors and hinged wooden doors are compatible with this doorframe.

THE ALLIANCE BETWEEN DESIGN AND ACOUSTICS

A simple glass with fine joints until 16 mm Silence allows the Boreale partition to realize high acoustics performances.

« Enhance your space management »

“

The Boreale partition gives a clean design to your space management.

Thanks to its thinness and its innovative design, the Boreale underscores transparency and brightness. ”

BORÉALE

DOOR LEAF

Tempered glazed door leaf, 40mm wooden door, framed aluminum door with simple or double glass

DOORFRAME

Self-locking reversible doorframes, height 2040mm with glazing fixed frame or full height edge to edge

GLASS

Glass from 10mm to 88/2 Silence (for industrial style the adjunction of an intermediate Column is necessary)

TYPE

Transparent modular partition, simple centered panel and thinner frame with a 48mm total thickness (possible in industrial glass style)

FRAMEWORK

Smooth high monobloc,
Smooth low, departures walls and intermediate posts with invisible clipped joint covers,
Glazing junction and cladding by an edge-to-edge system,
Self-locking reversible doorframes (mounting without posts) equipped with:
-adjustable in height hinges,
-isophonic joint (EPDM),
- anodized aluminum strike plates
Options: for industrial style the adjunction of an intermediate Column

GLASS

Tempered glass, from 10mm to 16mm
Options: acoustic glass

SOLID PANELS

Options: from 12mm to 16 mm chipboard, with melaminated or steel-faced panels. . .

DOORS

Glazed Door leaf, 8mm glazed door thick
Options: 40mm thick laminated wooden door, simple or double glazed, framed aluminum door . . .

ACOUSTICS

Refer to the data's given by the glass and panels producers used.

La BORÉALE...

... In industrial glass style

To answer to the growing demand from our architect partners, we decided to create a new evolution to our Boreale partition.

Inspired by the industrial or artist's studio style, this Boreale version fulfills its aesthetic role and guarantees the acoustic wellness for your workplace.
